Marker Tape

Underground utility warning & protection products

Product overview

Warning products help make buried utility routes visible during future excavation and maintenance. Final product construction and marking should be confirmed against the project specification and local requirements.

Product	Typical use	Options to confirm
Underground warning tape	Visual warning above buried water, gas, power or communication lines.	Material, width, colour, roll length, printed legend and packing.
Underground warning mesh	Warning layer positioned above underground services.	Polymer, width, mesh opening, colour, roll length and printing.
Detectable warning tape	Visual warning with a metal element for later locating.	Aluminium foil or stainless-steel wire construction; width, length and message.
Cable protection cover	Warning and mechanical protection above buried cables.	Board type, dimensions, colour, marking and project installation method.

Project enquiry checklist

Please include product type, utility/service, width and roll length or board dimensions, colour, printed wording, order quantity, packaging preference and destination country. Samples or technical documents can be discussed when requesting a quotation.
